Fetches: 2026-07-30T21:43:10.326Z

Lighthouse 13.4.1

Generated for task attachment · 2026-07-30T21:56:32.806Z

Category scores

Scores below are from this report's run (pre-fix baseline unless you re-ran after fixes).

Performance (pre-fix): 63

How quickly the page loads and becomes usable. Factors include First Contentful Paint (FCP), Largest Contentful Paint (LCP), Speed Index, Total Blocking Time, and overall payload size. Lower scores usually mean heavy images/JS, render-blocking resources, or slow server responses.

Accessibility: 96

Whether people can use the page with assistive tech and clear UI. Checks things like color contrast, image alt text, form labels, and accessible names that match visible text. A high score means fewer barriers for screen readers and keyboard users.

SEO (pre-fix): 92

Search-engine readiness basics: valid robots.txt, crawlable links, document title/meta description, viewport, and similar signals. This is not a full SEO audit—only Lighthouse's automated checks that help crawlers find and understand the page.

Failing / partial audits (18)

Score 0 = fail; scores between 0 and 1 are partial. Dev/Vite runs inflate Performance — this file uses the saved JSON report path below.

[0] Background and foreground colors do not have a sufficient contrast ratio.

id: color-contrast · accessibility

[0] Improve image delivery

id: image-delivery-insight · performance · Est savings of 1,202 KiB

[0] Elements with visible text labels do not have matching accessible names.

id: label-content-name-mismatch · accessibility

[0] Largest Contentful Paint

id: largest-contentful-paint · performance · 10.8 s

[0] LCP request discovery

id: lcp-discovery-insight · performance

[0] Network dependency tree

id: network-dependency-tree-insight · performance

[0] Render-blocking requests

id: render-blocking-insight · performance · Est savings of 430 ms

[0] robots.txt is not valid

id: robots-txt · seo · 38 errors found

[0] Reduce unused CSS

id: unused-css-rules · performance · Est savings of 36 KiB

[0] Reduce unused JavaScript

id: unused-javascript · performance · Est savings of 344 KiB

[15] First Contentful Paint

id: first-contentful-paint · performance · 4.5 s

[22] Time to Interactive

id: interactive · performance · 10.8 s

[50] Use efficient cache lifetimes

id: cache-insight · performance · Est savings of 5 KiB

[50] Avoid enormous network payloads

id: total-byte-weight · performance · Total size was 3,192 KiB

[50] Image elements do not have explicit `width` and `height`

id: unsized-images · performance

[72] Speed Index

id: speed-index · performance · 4.5 s

[98] Max Potential First Input Delay

id: max-potential-fid · performance · 80 ms

[99] Total Blocking Time

id: total-blocking-time · performance · 90 ms

Notes

- Report source file: lighthouse-report-prod.json
- Automated coverage: Playwright @lighthouse suite (PW-LH-*) and Vitest VT-LH-001 (robots.txt).
- Remaining high-impact items typically include image compression and unused JS code-splitting.
