Fetches: 2026-07-30T22:13:31.450Z

Lighthouse 13.4.1

Generated for task attachment · 2026-07-30T22:16:26.002Z

Category scores

Scores below are from the post-fix re-run against production.

Performance: 91

How quickly the page loads and becomes usable. Factors include First Contentful Paint (FCP), Largest Contentful Paint (LCP), Speed Index, Total Blocking Time, and overall payload size. Lower scores usually mean heavy images/JS, render-blocking resources, or slow server responses.

Accessibility: 100

Whether people can use the page with assistive tech and clear UI. Checks things like color contrast, image alt text, form labels, and accessible names that match visible text. A high score means fewer barriers for screen readers and keyboard users.

SEO: 100

Search-engine readiness basics: valid robots.txt, crawlable links, document title/meta description, viewport, and similar signals. This is not a full SEO audit—only Lighthouse's automated checks that help crawlers find and understand the page.

Failing / partial audits (11)

Score 0 = fail; scores between 0 and 1 are partial. Dev/Vite runs inflate Performance — this file uses the saved JSON report path below.

[0] Improve image delivery

id: image-delivery-insight · performance · Est savings of 204 KiB

[0] Network dependency tree

id: network-dependency-tree-insight · performance

[0] Render-blocking requests

id: render-blocking-insight · performance · Est savings of 300 ms

[0] Reduce unused CSS

id: unused-css-rules · performance · Est savings of 24 KiB

[0] Reduce unused JavaScript

id: unused-javascript · performance · Est savings of 36 KiB

[50] Use efficient cache lifetimes

id: cache-insight · performance · Est savings of 5 KiB

[66] First Contentful Paint

id: first-contentful-paint · performance · 2.5 s

[79] Largest Contentful Paint

id: largest-contentful-paint · performance · 3.0 s

[91] Time to Interactive

id: interactive · performance · 3.6 s

[98] Speed Index

id: speed-index · performance · 2.5 s

[99] Max Potential First Input Delay

id: max-potential-fid · performance · 80 ms

Notes

- Report source file: lighthouse-report-final.json
- Automated coverage: Playwright @lighthouse suite (PW-LH-*) and Vitest VT-LH-001 (robots.txt).
- Remaining high-impact items typically include image compression and unused JS code-splitting.
